

AYUSH CHAUDHARY

Mathura, India — +91 7505975585 — ayush.chaudhary2306@gmail.com — LinkedIn — GitHub

SKILLS

- **Programming Languages:** Java, Python, C, SQL, JavaScript
- **Software Development:** Data Structures & Algorithms, Object-Oriented Programming, RESTful APIs, System Design Basics
- **Web & Application Development:** React, Node.js, Express, Flask, HTML, CSS
- **Databases & Cloud:** MongoDB, Relational Databases (SQL), Microsoft Azure
- **DevOps & Tools:** Git, Docker, CI/CD Pipelines, VS Code, PyCharm
- **Core CS Concepts:** Operating Systems, Computer Networks, DBMS
- **Professional Skills:** Problem-solving, debugging, technical troubleshooting, cross-team collaboration, adaptability

EDUCATION

Bachelor of Technology in Computer Science Engineering

Aug 2023 – May 2027

GLA University, Mathura, India

- CGPA: 9.29 (Year 1), 9.04 (Year 2)
- Ranked among the top 1% of engineering students

EXPERIENCE

JOVAC – Machine Learning Trainee

June 2025 – July 2025

- Designed and developed a text classification system as part of the SpeakWise project, applying structured software development practices and modular coding.
- Performed data preprocessing, feature engineering, and analysis using Pandas and NumPy to support debugging, performance tuning, and model optimization.
- Implemented and evaluated multiple supervised learning models (Decision Trees, Random Forests, Naïve Bayes), improving solution reliability and accuracy.
- Collaborated in a team environment to break down problem statements, troubleshoot issues, and deliver scalable solutions within defined timelines.

PROJECTS

Speakwise – AI Communication Coach GitHub

August 2025 – Present

- Architected and developed a full-stack application using React, Node.js, Express, and MongoDB, following scalable software design principles.
- Built and integrated RESTful APIs and real-time Speech-to-Text pipelines, improving system responsiveness and user feedback accuracy by 40%.
- Applied structured debugging and performance optimization techniques to enhance application stability and reduce latency.
- Collaborated on feature design, implementation, and iteration, ensuring alignment with user requirements and product goals.

ML-Powered Internship Recommendation System GitHub

August 2025 – Sept 2025

- Developed a recommendation system delivering personalized internship suggestions using TF-IDF and cosine similarity algorithms.
- Designed backend services using Flask and MongoDB, ensuring efficient data handling and system reliability.
- Improved recommendation accuracy and consistency by 40% through data processing and algorithm optimization.
- Focused on clean code practices, modular design, and maintainability for scalable system development.

CERTIFICATIONS AND ACHIEVEMENTS

- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- Oracle Cloud Infrastructure 2025 Foundations Associate (1Z0-1085-25)
- Two-time NPTEL national course topper
- National Semi-finalist, Tata Imagination Challenge 2024
- Second Runner Up - Idea Pitching Competition, First Global AI Summit 2026
